Education

Manipal University Jaipur — Jaipur, India
B.Tech, CSE (Data Science) — CGPA: 8.58/10.0 — *2023 – 2027*

Government Senior Secondary School — Dausa, Rajasthan
XIIth Standard, Rajasthan Board — 88.8% — *2019 – 2021*

Gayatri Public School — Dausa, Rajasthan
Xth Standard, Rajasthan Board — 71.5% — *2017 – 2019*

Core Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Experience

Soul AI (via Deacon AI) — Remote
AI Freelancer – Code Evaluation & Algorithm Auditing — *Present*

- Audit machine learning and deep learning code generated by LLMs for execution efficiency, structural correctness, and adherence to software engineering best practices.
- Conduct detailed qualitative analysis and data evaluations to benchmark LLM outputs against complex structural and logical reasoning expectations.
- Evaluate algorithmic implementations for time and space complexity, ensuring optimal performance across various data structures and execution environments.

Projects

Graph-Based RAG & Agentic System | ***Python, LangChain, LangGraph, NetworkX, Neo4j***

- Developed a scalable data ingestion pipeline to parse unstructured files and serve real-time contextual queries using vector search combined with graph databases.
- Implemented graph-based node extraction and autonomous workflows to navigate multi-hop reasoning tasks, optimizing retrieval structures and significantly reducing hallucinations.

AI Image Detector (VISTA'25 Hackathon) | ***Python, TensorFlow, Keras, OpenCV***

- Engineered a high-performing deep learning model to classify images as authentic or AI-generated, securing a Top 10 ranking in the VISTA'25 Computer Vision Hackathon.
- Architected a Convolutional Neural Network leveraging transfer learning to maximize feature extraction, achieving 96% validation accuracy and robust computational efficiency.

Automated Text Condenser | ***Python, NLP, Flask/Streamlit, Transformers***

- Engineered an automated text summarization tool utilizing advanced NLP and extractive summarization algorithms to condense lengthy documents while preserving semantic fidelity.
- Built modular inference routines and API endpoints for seamless integration and deployment of text extraction pipelines into broader application ecosystems.

Achievements & Honors

Competitive Programming: Solved over 200 Data Structures and Algorithms (DSA) problems in Python on LeetCode, optimizing solutions for stringent time and space complexities.

Hackathon Rankings: Ranked Top 10 in VISTA'25 Computer Vision Hackathon and secured a Top Finalist position in the Amazon ML Challenge 2025 out of thousands of teams.

Amazon ML Summer School (2026): Selected into the highly competitive, selective nationwide training program focusing on scalable algorithms and machine learning systems.

Published Indian Patent (2025): Co-inventor of "A Closed-Loop Personalized Avatar and Outfit Recommendation System" (App. No. 202511103291 A, Published Dec 2025).

Technical Skills

Programming Languages: C/C++, Python, SQL (MySQL), JavaScript
Core Computer Science: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management, Operating Systems
Infrastructure & Tools: Git, GitHub, Jupyter, Postman
Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, OpenCV, LangChain
