Education

Manipal University Jaipur — Jaipur, India
B.Tech, CSE (Data Science) — CGPA: 8.58/10.0 — *2023 – 2027*

Government Senior Secondary School — Dausa, Rajasthan
XIIth Standard, Rajasthan Board — 88.8% — *2019 – 2021*

Gayatri Public School — Dausa, Rajasthan
Xth Standard, Rajasthan Board — 71.5% — *2017 – 2019*

Experience

Soul AI (via Deacon AI) — Remote
AI Freelancer – LLM Evaluation & Machine Learning — *Present*

- Take end-to-end ownership of model evaluations, conducting qualitative analysis to benchmark LLM outputs for complex reasoning and problem-solving accuracy.
- Audit machine learning and deep learning code generated by LLMs for execution efficiency, structural correctness, and adherence to software engineering best practices.
- Engineer structured prompt workflows and apply Reinforcement Learning from Human Feedback (RLHF) to optimize model alignment and inference performance.

Projects

Graph-Based RAG & Agentic System | ***Python, LangChain, LangGraph, NetworkX, Neo4j***

- Developed a Retrieval-Augmented Generation (RAG) pipeline combining vector search with knowledge graphs to capture entity relationships across dense technical documents.
- Implemented graph-based node extraction and integrated agentic workflows to enhance context retrieval accuracy for multi-hop reasoning tasks, significantly reducing hallucinations.
- Architected data manipulation and data engineering pipelines to parse unstructured files and serve real-time contextual queries.

Cervical Cancer Classification (MHSA & WGAN-GP) | ***Python, PyTorch, CNNs, MHSA***

- Engineered a dual-stream deep learning framework utilizing CNNs for local feature extraction and Multi-Head Self-Attention (MHSA) for global context modeling to classify cervical cancer cells.
- Applied Wasserstein GAN with Gradient Penalty (WGAN-GP) for data augmentation, achieving a state-of-the-art accuracy of 99.52% on the SIPAKMED dataset.

PlantCLEF Biodiversity Classification (Agrifutura – Kaggle) | ***Python, PyTorch, DINOV2***

- Developed a fine-grained visual categorization pipeline to predict plant species from high-resolution quadrat images, securing a Top 100 finish globally.
- Utilized self-supervised vision transformer architectures (DINOV2) to extract feature representations across massive scale-shifted environmental datasets.

Achievements & Honors

Accepted Research Paper (2026): First author of "A Hybrid Approach for Sorting Cervical Cancer Cells Using MHSA and WGAN-GP Techniques," accepted for publication.

Amazon ML Summer School (2026): Selected into the highly competitive, selective nationwide machine learning training program.

Amazon ML Challenge (2025): Secured a Top Finalist position in the national competitive hackathon out of thousands of participating teams.

Published Indian Patent (2025): Co-inventor of "A Closed-Loop Personalized Avatar and Outfit Recommendation System" (App. No. 202511103291 A, Published Dec 2025).

Technical Skills

Databases & Cloud: RDBMS (MySQL), Graph Databases (Neo4j), RDF, SPARQL, Cloud Computing
Infrastructure & Tools: Linux, Bash, Git, Jupyter, Streamlit, Plotly, OpenCV, Pandas, NumPy
Machine Learning & Data: Scikit-learn, Feature Engineering, Data Architecture, CNNs, Transfer Learning
Generative AI & NLP: Agentic AI, Large Language Models (LLMs), Prompt Engineering, RLHF, Transformers, LangChain, LangGraph
Programming & Frameworks: Python, JavaScript, PyTorch, TensorFlow, Keras, Hugging Face
