Aditya Goyal

Jaipur, India | +91 8905813391 | adityagoyal447@gmail.com | LinkedIn | GitHub

Professional Summary

Data Science and Computer Science engineering student with hands-on experience in Python, web frameworks (FastAPI, Flask, ReactJS), and data manipulation (Pandas, NumPy). Proven track record of building automated pipelines, integrating third-party APIs, and deploying technical solutions. Highly motivated to apply automation, API integration, and digital platform development skills to streamline investment consulting workflows and client reporting at Marsh.

Education

Manipal University Jaipur — Jaipur, India
B.Tech, CSE (Data Science) — CGPA: 8.58/10.0 — *2023 – 2027*

Government Senior Secondary School — Dausa, Rajasthan
XIIth Standard, Rajasthan Board — 88.8% — *2019 – 2021*

Core Coursework: Machine Learning System Design, Data Structures & Algorithms, DBMS, Operating Systems

Experience

Soul AI (via Deacon AI) — Remote
AI Freelancer – Intelligent Systems & Data Validation — *Present*

- Audit machine learning code written in Python and TensorFlow, ensuring adherence to quality, version control, and scalable software engineering practices.
- Apply reinforcement learning from human feedback (RLHF) to optimize large language model outputs for complex reasoning and data processing tasks.
- Perform rigorous data validation and debugging to improve the accuracy and consistency of technical models, reducing manual effort.

Projects

ResumeBuild - Full-Stack Web Application | *FastAPI, ReactJS, Pandas, Python*

- Developed an automated web application with a FastAPI backend and ReactJS frontend, demonstrating strong capability in modern web frameworks and UI component design.
- Integrated programmatic generation of PDF/Word documents for automated reporting, reducing manual effort and improving deliverable consistency.
- Utilized Pandas for data cleaning, transformation, and validation to ensure seamless data flow and accuracy.

Graph-Based RAG Enterprise Pipeline | *Python, LangChain, Neo4j, APIs*

- Engineered a Retrieval-Augmented Generation pipeline combining vector search with Neo4j knowledge graphs to map entity relationships.
- Researched architectures for indexing 100,000+ PDFs using hybrid search and cross-encoder reranking, showcasing ability to handle complex data workflows.

AgriFutura AI Diagnosis Platform | *Python, CNNs, OpenCV, Streamlit*

- Developed an end-to-end computer vision platform showcasing full software development lifecycle from data ingestion to UI presentation.

Achievements & Honors

Amazon ML Challenge (2025): Ranked in the Top 200 finalist teams nationwide, utilizing a multi-modal fusion architecture combining CLIP and text backbones.

Amazon ML Summer School (2026): Selected into the highly competitive, nationwide machine learning training program.

Published Indian Patent (2025): Co-inventor of "A Closed-Loop Personalized Avatar and Outfit Recommendation System" (Published Dec 2025).

Research Publication (2026): Co-authored paper on hybrid approaches for cell sorting (MHSA and WGAN-GP), accepted for publication.

Technical Skills

Languages & Frameworks: Python, SQL, FastAPI, Flask, ReactJS, Streamlit, Git
Data Processing & Automation: Pandas, NumPy, API Integration, Programmatic Document Generation
Machine Learning: PyTorch, TensorFlow, Scikit-learn, LangChain, Feature Engineering
Databases & Infrastructure: MySQL, Neo4j, REST APIs, Linux, Jupyter Notebook
